

Features and Specifications|AB25

The AB25 is an electronically controlled crimping press, designed to crimp strip form electronic and electrical solderless terminals. The advanced electronic control reliable circuit gives high performance and long reliability; designed for bench and automatic operation.

Ark-Les CORPORATION AB25 Press

Features

- Quiet operation
- Reliable high performance
- Minimum maintenance
- Are factory qualified before ship
- Single stroke and jog operation
- Electronic control reliable circuitry
- Interlock safety guarding system

Specifications

| | |
|--------------------|--|
| Overall Dimensions | 30.708in (780mm) X 11.417in (290mm) X 10.236in (260mm) |
| Electric Motor | Asynchronous Type |
| Motor Power RPM | 1.5 HP (1.1 KW) 1400 |
| AC Line Voltage | 1PH 120 VAC 60 Hz |
| Control Box | Solid State Power Circuit |
| Press Stroke | 1.575in (40mm) |
| Press Capability | 3 TON |
| Weight (Mass) | 209.51Lbf (6.509slug), 931.95N (95kg) |
| Crimping Capacity | 5 AWG (10mm ²) |
